Tabulation sheet is attached.

The reason for selecting the highest bidder was that the lowest bidder Universal Incinerator Division after several conversations, office visits, and telephone calls he has not satisfactorily complied with specifications of the bid. The delay has been because of his insistency that he could comply with all specifications. Never received an E.P.A. certification that he said was available and should have been enclosed with his bid. Because of these circumstances we are awarding it to Waste Equipment Corporation he has complied with every detail.

Subject: Test of Comtro Incinerator, Model A-22

To: Applicable Federal Agencies

We have received a report prepared by an independent testing concern on the compliance test of the Comtro Incorporated, Model A-22 incinerator manufactured by:

Comtro Incorporated  
North Wales, Pennsylvania 19454

The test results showed that the incinerator met the emission standards in the code of Federal Regulations (Title 42 CFR, Part 76) while burning Public Health Service type waste (similar to Type 1 waste) at a rate of 210 pounds per hour and while burning municipal waste (type 4) at a rate of 290 pounds per hour.

Based on the test performance of the incinerator while burning Public Health Service type waste, it is believed the incinerator can burn Type 0 waste at the rate of 160 pounds per hour and Type 2 waste at 320 pounds per hour and meet the Federal emission standards.

Burners adjustable up to 6000,000 Btu/hr.
